

Super Scientists!

RT have been learning all about gravity and similarities and differences between the planets. We learned that the first living things to go into space were fruit flies (1947), then monkeys (1949), then a dog (1957) shortly followed by Yuri Gagarin (1961) and Valentina Kershkova (1963). We made the planets in our solar system using paper maché techniques and painted them all the right colours. Have a look at some of our fantastic home learning too!

Uzodinma said ... "Why is Earth called the Goldilocks planet?" To which Ms Allen responded that I didn't know he then explained: "Because it is not too hot or too cold but just right!"

Who Am I?

By Nami Ramos, 5S

I set the sky on fire
shining blue, green and red.
Twisting through the icy night
I make myself dizzy.
Shining like emeralds.

The trees sway to my melody
disturbing the silent darkness.
I am a party of colour
cartwheeling around the globe
showing off.
Rubies glowing

Spying on me from a secret place,
the moon shines winking at my glow.
Running away from my radiance, I saw
the stars quickly put out their small night lights.
I twist and turn like smoke from a fire.
The soft snow lay on the cold ground, a sleeping
polar bear.

Who am I?

The Digestive System

Recently 6R recreated the stages of the digestive system using water, orange juice, chocolate cake, a plastic bag and a pair of stockings. It may sound crazy but it definitely helped us embed the sequence of digestion and the order of the organs within this system.

DATES FOR YOUR DIARY

Year 3 Trip to British Library
Thursday 26th
January 2017.

Year 1 and 2 Maths Workshop
Thursday 26th
January 2017,
4pm and 6pm.
